

Easy instructions

For use on aphids on roses indoors or outdoors.

Open lure packet. Do not touch lure with bare hands, use tweezers or rubber gloves. If you do touch the lure, you may attract aphids to yourself. Using a knife or scissors, cut into the center of the lure.

Clip the lure onto the upper stem of a rose bush. Use one dispenser for a single rose bush, or place dispensers every 4 to 7 feet in a grid throughout larger rose gardens.

Place dispensers early in the season for best results. replace Aphid Chaser every 4 weeks or when aphids reappear. Place used dispensers in regular garbage.

Keep out of reach of children and pets.
