

EASY INSTRUCTIONS:

Remove lid from jar. Fill jar half full with hot water. Open bait packet and add the entire contents to the water. Add 1 or 2 drops of dish soap and stir. Screw the lid onto the jar and open the flapper lid - the side with the small holes only. Place the trap about 2 feet from where fruit flies are seen.

WASH HANDS AFTER HANDLING BAIT.
KEEP BAIT AND TRAP OUT OF REACH OF CHILDREN AND
PETS

Long term use of the Kitchen Fruit Fly Trap will reduce troubling infestations without the use of toxic chemicals.

HELPFUL HINTS: Place traps on counters near fruit, or under cupboards near garbage containers or recycle bins. Allow at least 48 hours for the bait to become effective. You may need to move the trap after 3 or 4 days to improve catches. Lure solution is effective for 2 to 4 weeks, depending on weather and fly populations. Dispose of full traps in regular garbage when full of flies. Cleaning up sources of fruit flies will help reduce population buildup.

Safe for use in food-handling and food storage areas
